

Cement Conditioning Admixture CCA

Almost a decade in refinement extending the life in chemically harsh environments such as waste treatment facilities, silage and the mine tailing industry has proven EverTek's **Cement Conditioning Admixture CCA** the clear winner in conditioning your concrete for success in harsh environments!

Cement Conditioning Admixture CCA significantly extends the service life of concrete subjected to harsh environments. It produces a super hydrated cement which naturally creates more reacted cement molecules therefore transforming the concrete matrix into a denser, harder, less brittle structure. **Cement Conditioning Admixture CCA** conditions the concrete with molecules designed to repel chemical attack.

INCREASED CONCRETE STRENGTH OF UP TO 36%!

INCREASED ACID RESISTANCE OF UP TO 400%!

***A High-Performance Conditioning Admixture for Acid
and Chemical Resistance in Concrete.***
