

# PRO Tek Wood

**PRO Tek Wood** prevents deterioration and rot of wood. It organically reacts inside lumber, preventing moisture intrusion and making the inner structure of wood undesirable for pests and water permeation.

**PRO Tek Wood** is simple to apply, and a single application will last the life of the wood, noticeably extending the service life of decking, furniture, siding, and other wood structures. **PRO Tek Wood** also helps paints and stains adhere better and longer due to the inability of the wood to absorb moisture.

## Benefits

- Stops cupping, twisting, warping, and splintering of most wood types
- Prevents pulled nails or screws in decking or siding
- Reduces coating failure associated with moisture permeation
- Reduces or stops mold and algal growth
- Effective with a simple, one-time application
- Protects from insect attack
- Is environmentally safe for all

Extend the life of your wood and protect your investment with **PRO Tek Wood**. **Stop the moisture, stop the rot!**
