

ATTACK CES

ATTACK CES is a safe alternative to Muriatic Acid and stronger than Citric Acid, **ATTACK CES** is the premier concrete etching solution. Super concentrated and stronger surfactants reduce time and energy needed to clean or prepare concrete surfaces. Advanced chemistry eliminates the need for neutralization and only requires a water rinse.

Uses:

- Prepare concrete for stains, paints, sealers and cement-based coatings.
- Prepare concrete for application of overlays such as [PRO Surface HD](#) and [PRO Surface SF](#).
General cleaning aid prior to application of [PRO Tek Concrete](#).
- Clean concrete stamps and stamping tools.
- Remove mold release and stamp release.

ATTACK CES Cleans and removes scaling, rust stains, light oils, lime deposits, mineral deposits from most surfaces.
